

All of the HTML and most of the CSS is intact, but the box model properties have yet to be set. You'll use knowledge of `height`, `width`, `padding`, `border`, and `margin` to complete this project.

| | |
|---|---|
| 1 | <p>You'll go through Vegan Burger's menu item roughly from top to bottom. Let's begin with styling the <code><nav></code> element containing the logo and navigation elements.</p> <ul style="list-style-type: none">Set the width of the <code>img</code> to 180 pixels.Center the <code>img</code> horizontally using the <code>margin</code> property. |
| 2 | <p>Set margin of <code>span</code> elements inside the <code>nav</code> to 10 pixels on the top and bottom, and 0 pixels on the left and right.</p> |
| 3 | <p>Now set some rules for the element with the class <code>content</code>. This element is a container for all the elements not included in <code><nav></code>.</p> <ul style="list-style-type: none">Set the height to 500 pixels.Create 10-pixel vertical margins and automatic horizontal margins.Set <code>.body</code> elements inside <code>.content</code> to have no vertical margin and automatic horizontal margins so that it is centered |
| 4 | <p>With a 500-pixel height for <code>.content</code>, some elements will overflow out of its box if the browser window is made too small.</p> <ul style="list-style-type: none">Make <code>.content</code> scrollable with the <code>overflow</code> property.Resize the browser window so it is very skinny and notice that this section is now scrollable. |
| 5 | <p>Now it's time to tackle the <code>.header</code> and its <code>h1</code> text: 'BBQ VEGAN BURGER'.</p> <ul style="list-style-type: none">Set the height of the <code>.header</code> class to 320 pixels.Create a 20-pixel padding for the <code>h1</code> element inside the <code>.header</code>.Set vertical margins to 0 pixels and the horizontal margins to be determined automatically for the same <code>h1</code> element. |
| 6 | <p>Now add some box-model formatting to the 'ORDER NOW' <code>.button</code> element. As you make each change, make sure to scroll down if necessary to view the effect on the button.</p> <ul style="list-style-type: none">Set the width to 200 pixels.Set the padding to 20 pixels.Set the vertical margins to 40 pixels and the horizontal margins to automatic.Give the button a 1-pixel, solid, blue border. |
| 7 | <p>Finally, style the nutrition facts section at the bottom. In the element selected with <code>ul.nutrition</code>:</p> <ul style="list-style-type: none">Set the padding of the <code>ul.nutrition</code> element to 20 pixels.Set the width of <code>li</code> elements within the <code>ul.nutrition</code> to 200 pixels.Set a 10-pixel vertical padding and 20-pixel horizontal padding to the same elements.Add a 3-pixel bottom margin to the same elements. |
| 8 | <p>Good job—this menu item is looking great, and the layout and spacing is much more readable. If you'd like, you can continue refining the design or add your own spin!</p> |
